DETAILED ACTION

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 1 stands rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #6,536,162 to LaMAY. LaMAY discloses the use of a decoration panel including a main panel (37) having a plurality of holes first holes (51) aligned along an upper and a lower vertical portion thereof, at least one sub panel (48) having a front cover (F) and a plurality of second holes (45) on a rear thereof, and at least a joiner (38) engaged through the second holes (45) into the first holes (51) to join the sub panel (48) to the main panel (37) such that the length of the decoration panel is selectively adjustable.

Allowable Subject Matter

Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed 10/23/06 have been fully considered but they are not persuasive. With regards to the applicant's argument that LaMAY is not adjustable by selective positioning of the joiner, clearly the joiner of LaMAY is fully capable of being inserted in any hole along the length of the sub-panel (48).
